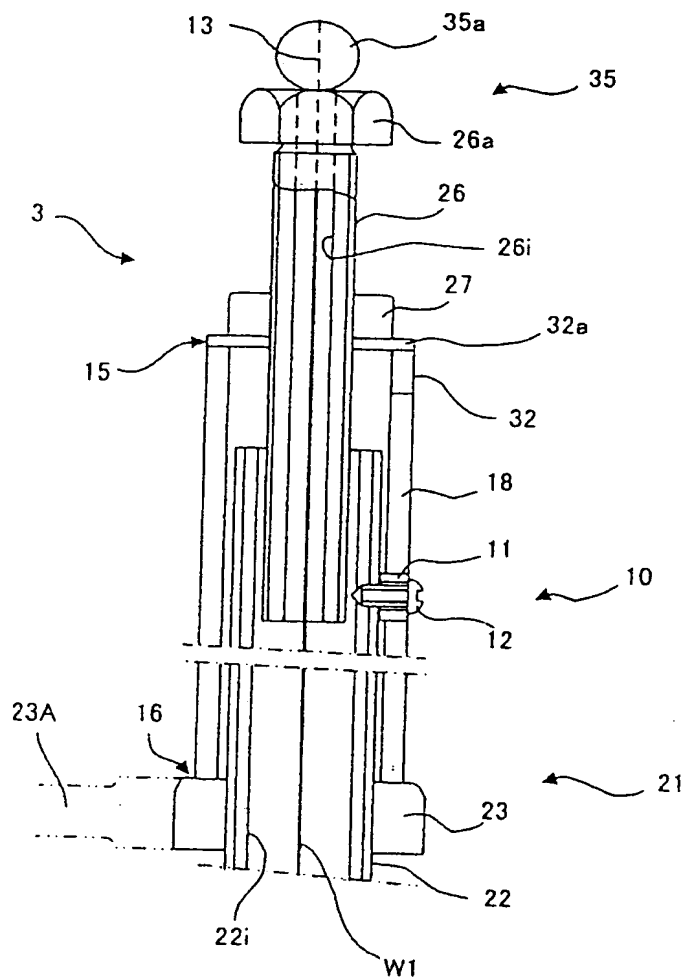

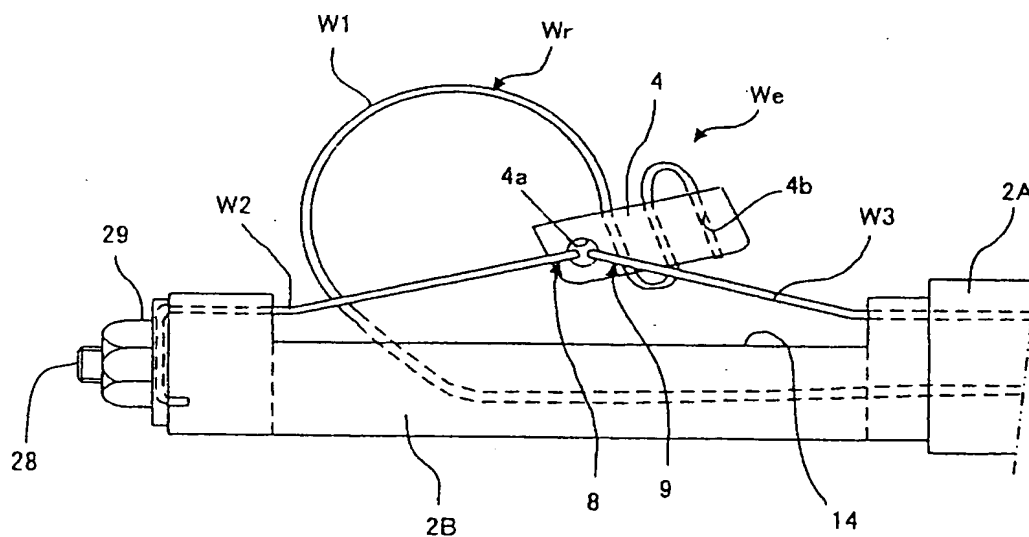

Fig. 4

A diagram of a long bone, oriented horizontally. The bone has two rounded, bulbous ends (epiphyses) and a central shaft (diaphysis). A dashed line labeled 'A' passes through the center of the bone, representing the longitudinal axis. A vertical dashed line labeled 'B' passes through the center of the shaft, representing a cross-section. A label 'C' points to the epiphysis on the left side of the bone.
